

It's your choice! It's your money!

Most people have no idea that they have a choice as to where to go to have their diagnostic testing completed.

You can go to a hospital and experience the hassle and the never-ending paperwork. The long waits and impersonal treatment as they try to squeeze in as many tests as quickly as possible. And, the days that your doctor might have to wait for results as the hospital's in-patients' testing takes priority over outpatient tests.

You can go to a hospital-owned imaging center and while the experience may not be as hectic, your costs may be significantly higher than at DIS. You're also likely to get more than one bill in the mail, which can be very confusing and often perplexing.

Ever try contacting a hospital or their center to get a price quote? Good luck! Getting accurate costs for ALL services is very difficult and nearly impossible. At DIS, we tell you the cost of every exam we do. If you find another price that is lower than ours, we'll match it. Simple. Easy. Trouble-free.

At Diagnostic Imaging Services, we have:

- Saturday and early morning service hours, with evening hours until 7:00 p.m. in Metairie.
- Plenty of ground floor parking.
- An online registration option – save time!
- No dark, crowded and chaotic multi-story parking garages; no elevators or dirty stairways.
- Caring, personal and respectful treatment by experienced and friendly DIS personnel.
- Next business day report turnaround to your practitioner for most common exams and imaging studies.
- Radiology subspecialists in neuroradiology, chest/pulmonary, body imaging, musculoskeletal and women's imaging, and MRI, CT and ultrasound modalities.

Seven locations to serve you!

East Bank

4241 Veterans Blvd., Suite 100, Metairie, LA 70006
3434 Houma Blvd, Suite 100, Metairie, LA 70006

West Bank

925 Avenue C, Marrero, LA 70072
4809 Wichers Dr, Marrero LA 70072

Northshore – East

1310 Gause Blvd, Slidell, LA 70458

Northshore – West

71154 Highway 21, Covington, LA 70433
1200 Pinnacle Pkwy., Suite 5, Covington LA 70433

Appointments: (P) 504-883-5999 or 985-641-2390

Call 504-459-3220 for pricing on any of our examinations or insurance benefits verification.

Covington | Slidell**

One-Stop Imaging Shopping!

- NeuroQuant Volumetric MRI
- 3T MRI Susceptibility Weighted Imaging
- High Field Open MRI Blood Sensitive Imaging
- Neurography
- DaTscan I-123 with DaTQUANT
- Prostate 3T MRI with Invivo DynaCAD
- Non-contrast MR Angiography
- CereScan® brain SPECT
- Breast MRI and Breast Biopsy
- Breast Cyst Aspiration & Galactogram
- MR Enterography
- Essure® Confirmation Test
- X-Ray with Stitching (to detect scoliosis)

- Genius 3D Mammography
- Screening and Diagnostic Mammography
- Ultrasound with Color Doppler
- Bone Density Studies (DEXA)
- Ultra-High Field & High Field MRI
- High Field Open MRI
- CT & Ultra-Low Dose CT
- PET/CT
- Nuclear Medicine
- Angiogram & Arthrogram
- Hysterosalpingogram
- Digital Fluoroscopy
- Image Merge
- X-Ray

Contemporary Technology

Our technology is state-of-the-art, as DIS continues to invest in the latest systems and services that are often of limited availability on the Gulf South within an outpatient facility. Our specialization includes:

- **Prostate 3T MRI:** MRI is an emerging tool for early imaging of prostate cancer and other prostate-related conditions. Powerful postprocessing of images may show specific, suspicious areas with the prostate. Better images mean better results. DIS is the only independent provider in Louisiana and the Gulf South offering our unique technology, analytical and team radiology imaging solution.
- **Genius 3D Mammography:** This revolutionary state-of-the-art technology gives radiologists the ability to view inside the breast layer by layer, helping to see the fine details more clearly by minimizing overlapping tissue.
- **High Field Open Non Claustrophobic MRI:** With our high field open sided MRI's, you can look around a full 270 degrees. Our open MRI accommodates people weighing up to 660 lbs. DIS has the two strongest open MRI scanners in southeast Louisiana.
- **Breast MRI:** MRI of the breast may be the best alternative to discover what is happening with women who have findings on mammography and/or ultrasound tests. It's also utilized for women who are under suspicion of breast cancer or have already been diagnosed.
- **Breast Biopsy:** Via ultrasound, x-ray or MRI, biopsy is highly accurate in evaluating suspicious masses within the breast. Breast biopsy also directs the need for surgical biopsy.
- **PET/CT:** PET is a powerful tool for diagnosing and determining the stages of many types of cancer. PET scans can eliminate the need for surgical biopsy because it can detect whether lesions are benign or malignant. PET is also currently the most effective way to check for cancer recurrence.

Financing Assistance

We also understand that sometimes diagnostic testing is expensive, even if you have insurance. We do not want anyone to have to forego testing because of finances, so we are here to help!

- Nearly every area health insurance plan accepted, including Medicare and Medicaid.
- In the majority of instances, lower out-of-pocket payments are at DIS as compared to a hospital-owned imaging center.
- One fee covers everything we do. Hospitals often charge separately for radiology services and usage of their imaging facility.
- DIS offers CareCreditSM, a healthcare credit card program that provides a financing option to ease the burden of healthcare expenses.
- Multiple forms of payment accepted: cash, check, money order, debit card or major credit cards.
- With DIS\$ELFPAY, special discounts are offered for cash paying patients who have no health insurance coverage.

Our experienced and friendly patient financial services team can assist in navigating the maze of prices, insurance, benefits, copays and out-of-pocket obligations. Put them to work for you!
